Figure 29 shows a birdhouse designed for wrens and house finches. For wrens it may be placed on a tree or fence post. If attached near the eaves of a building, house finches or wrens will use it.

The front gable is open, entrance to the room below being through the rear of the upper floor. This house can be opened for cleaning by lifting out the upper floor. (d)

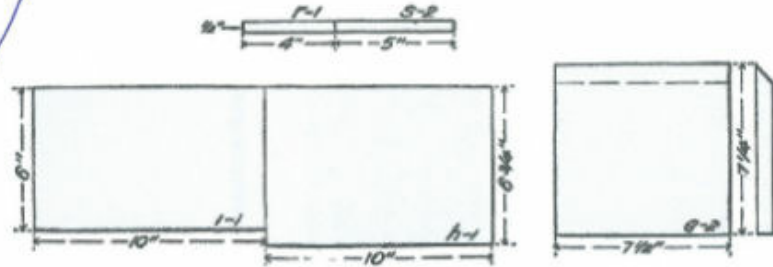

Fig. 31.-Lumber diagrams for house shown in figure 29. Thickness of boards 3/4 inch.

Please note:
 There isn't any round entrance hole.
